

Steri 35 Litre Autoclavable Clinical Waste Container

Technical Data Sheet (TDS)

QSsi 35

PRODUCT OVERVIEW

The Steri 35 Litre Autoclavable Medical Waste Container is an autoclavable yellow medical waste container designed for sterilisation and disposal of infectious clinical waste through the autoclave process. Constructed from polypropylene and supplied as a high-visibility yellow medical waste container, it provides an identifiable, controlled disposal point that supports safe handling of clinical waste.

WHY THIS PRODUCT EXISTS

Clinical waste disposal points can present significant operational and compliance risks, including:

- Cross-contamination risks
- Incorrect disposal of contaminated clinical waste
- Compliance failures where sharps are not controlled at point of use

This container is designed to mitigate these risks by providing a purpose-built sharps disposal point matched to the application, waste type and required capacity.

PRODUCT FUNCTION

The QSsi 35 provides controlled containment for contaminated clinical waste. It supports:

- Autoclave-compatible containment for clinical waste sterilisation
- Small red lid opens at approximately 110 degrees C to support vacuum-steam-vacuum sterilisation
- Stackable and nestable format for logistics and storage
- Clear identification of biohazard and medical waste disposal points
- Compatibility with IDC Medical QS Series waste systems

KEY BENEFITS

- Improves compliance with clinical waste handling procedures
- High-visibility yellow finish increases hazard awareness
- Durable polypropylene construction supports reliable routine use
- Final closure features help prevent access after disposal
- Supports consistent and standardised sharps waste handling procedures

SYSTEM COMPATIBILITY

- Autoclave and contaminated clinical waste workflows
- Suitable for clinical waste handling procedures where the nominated capacity and aperture match the waste stream

Steri 35 Litre Autoclavable Medical Waste Container

Technical Data Sheet (TDS)

QSsi 35

TECHNICAL SPECIFICATIONS

Specification	Details
Product Type	Seamless Injection Moulded
Product Description	Yellow Medical Waste Steri Safe
Re-order Number	QSsi 35
Capacity to Fill-line	29.75 litre
Capacity to Spill-line	35 litre
Lid Aperture / Top Opening	365 mm x 340 mm
Final Closure	Autoclave-responsive small red lid opens at approximately 110 degrees C
Application	Sterilisation container for contaminated clinical waste transformed into neutralised waste through autoclave processing
Shape	Square
Material	Polypropylene
Construction	Seamless injection moulded autoclavable medical waste container with stackable/inter-stacking design
Dimensions (Unit)	330 mm (H) x 390 mm (W) x 390 mm (D)
Indentification	Yellow medical waste

PACKAGING & LOGISTICS

Specification	Details
Standard Pack Size	5 units per carton
Pack Weight	7 kg
Pack Dimensions	750 mm (H) x 400 mm (W) x 400 mm (D)
